Subject: Homeless feces

For the past week me & my family been having to deal with the smell of feces these people have place by fire hydrant by my house and by entry way to county pumping station, I have reported it to 311 but reffered to sanitation. Again a department that has lazy people that don't want to work. My daughter called sanitation yesterday because she is angry that nothing is getting done and feed up with this smell also. Here are some pics attached of the feces & corporates
